ENVIRONMENTAL, HEALTH AND SAFETY POLICY VALUES, AND COMMITMENTS

POLICY

Inter Pipeline Fund ("Inter Pipeline") will manage all operations in a manner that protects the health and safety of employees, contractors and the public, as well as protecting the environment while complying with and, where appropriate, exceeding applicable laws, regulations, industry and internal standards and stakeholder expectations.

Inter Pipeline will continually improve safety and environmental performance by proactively evaluating its operations to identify hazards, assess priorities and implement programs and practices to reduce the number and severity of safety and environmental-related incidents towards a goal of zero incidents.

VALUES

- Positive safety and environmental performance is essential to the success of Inter Pipeline and its employees.
- Safety and environmental performance comes first, regardless of the scale or urgency of the job.
- Employees must be provided with the training and tools necessary for them to perform their jobs safely and in conformance with regulatory and Inter Pipeline requirements.
- Accidents, environmental releases or property losses are unacceptable.
- Employees have the right, the responsibility and the ability to prevent accidents.
- Employees and contractors are responsible for understanding and complying with applicable Acts, regulations and Inter Pipeline requirements relating to their job performance as a condition of employment.

COMMITMENTS

Inter Pipeline will:

- Communicate this policy to all employees regularly and ensure this is displayed prominently.
- Set annual corporate and business-level EH&S objectives and measures, which are periodically reviewed by management.
- Promote and support a culture of accident, injury and environmental damage prevention by recognizing, assessing and controlling workplace hazards and loss sources.
- Regularly audit and inspect our assets and operating practices and take appropriate corrective actions to resolve deficiencies and continually improve.
- Report all EH&S incidents as required by regulations and internal requirements, and take the appropriate immediate corrective responses.
- Effectively learn, create knowledge and improve our EH&S performance through training, reporting and investigating incidents to develop effective corrective actions and implement preventative strategies.
- Design, construct, operate and maintain our facilities with the goal of eliminating wasteful practices and reducing the potential for loss.
- Track key performance measures and regularly report on our EH&S performance.
- Proactively work with industry peers and regulators to develop and advance effective approaches to EH&S protection.
- Be attentive to our employees, customers, contractors, neighbours and regulators to continuously improve our operational performance and management systems.
